Just drag-and-drop, and you're done! How it works When you drop files into the Dynamics Hub, they are indexed by MobiExplorer, a small utility that scans the MobiPocket file format. The file is then sent to the cloud where it is processed for uploading to the social network, PC, or mobile phone. Once the file is uploaded, it is automatically shared with everyone on the account, including all of your social networks. Main features Simple Drag and Drop Simply drag-and-drop files directly from Windows Explorer into the Dynamics Hub. They are indexed by MobiExplorer, which searches for the MobiPocket file format and sends them to the cloud. Once in the cloud, the file is processed for upload to social networks, PC, or mobile phone. Social Networks The Dynamics Hub connects to your social networks. As soon as your files are uploaded, they're shared with everyone on your account, including all of your social networks. Your files will also be

visible in your stream on all of those sites, so they are easy to share and will be shared immediately. PCs, Mobile Phones, and the Cloud You can upload your files to the cloud and have them processed for upload to PCs, mobile phones, and the cloud. All uploads are processed in the cloud, so your files will be immediately shared with your PC or mobile phone as soon as they're uploaded. If you're connected to the cloud, your files will be visible in the cloud's search engine, so they will be easy to find. If you're not connected, your files will still be automatically uploaded to the cloud. Quick Share The

We live in the hills of Los Alamos and it's the perfect way to get out of the winter doldrums. On our recent hike to Picacho Peak, however, my oldest daughter's foot got a little wet. If you live in New Mexico, you've probably had a run-in with moss or algae growing on your hiking shoes, a phenomenon I've coined "mossy feet." Mossy feet is no joke. It's not just your feet that will be moist, but your boots as well. The surface moss will grow into the inner surfaces of your shoes making them moldy and disgusting. A friend of mine mentioned that she actually found some moss growing on a hiking trail in the Jemez Mountains. I was actually shocked! For me, moss is a rarity. I find the idea of moss growing on the ground to be completely unbelievable. Yet, my daughter's shoes were covered. I started searching the internet for mossy feet solutions. Here are some I found. Zwinky's Cotoneaster Shoe Cream First I tried Shoe Care. It's the perfect hiking-sized bottle. The thick, peanut butter-like consistency spreads easily and evenly onto your shoes. I also have a Zwinky's sticky shoe pad on my hiking shoes, but I don't recommend using them together for two reasons: (1) Moss is going to grow. It grows over time as the shoes dry out. (2) The potpourri smell is
